Popular choices exceptional solutions

We present you a selection of solutions that were chosen the most over the years and became your favourites. Our best sellers withstood the test of time and proved their value even in the most demanding projects.

When choosing a KLEEMANN lift, you have the control. Pick from futuristic, modern, classic cabins, and create your ideal design with ceilings, floors, walls, handrails, and operating panels.

These parts are also available as components, giving the option of modernisation for pre-existing lifts.

Start your journey and design your cabin through our interactive virtual showroom designyourlift.com.

All popular options are in compliance with EN81.20

CABINS COLLECTION

CLASSIC A310

The KLEEMANN Classic Athena A310 cabin is one of the most popular choices for a practical but elegant lift solution. Combining multiple design tools, create a cabin to your own design specifications and take advantage of a wide range of laminate walls, floor and ceiling options.

A great choice for residential uses and private residences, this cabin presents a versatile and cost-effective solution.

World class design

Since 2007, KLEEMANN has launched its creative research, in cooperation with the industrial designer Andreas Zapatinas. That was the beginning of a new era. Through this rewarding partnership, new technical and aesthetic solutions were explored and developed. Inspired by human needs, KLEEMANN focuses on shaping new space qualities that lift the passenger's mood and stimulates interaction inside the elevator.

Customised solutions

We have a passion to design cabins that combine innovation, class and functionality. With a solution-driven creative force, our highly specialised design team goes beyond standard, creating custom solutions even for the most challenging of your projects. Offering you flexibility and the best of design solutions, we work with you at all stages providing a totally elevated customer experience.

Work with our specialised design team, to create the aesthetics of your ideal cabin

Our cabins

KLEEMANN Design is about life. Going far beyond the elevator design, KLEEMANN cultivates a whole design culture that elevates each and every aspect of its operation. It is a way of thinking, a mindset of innovation. Rather than thinking of the elevator as a box, KLEEMANN Design thinks of it as a unique space in the building and transforms the whole elevator experience into a new value for the people, the bulding, the environment.
